

MOHOMED SAROOK MOHOMED SHABEEHA

Software Engineering Graduate | Full-Stack Developer | Machine Learning Applications

Colombo 07, Sri Lanka

GitHub: [ShabeehaSarook](#)

+94 76 769 6288

LinkedIn: [Add profile URL](#)

shabeehazarook@gmail.com

Nationality: Sri Lankan

PROFESSIONAL PROFILE

Passionate and results-driven Software Engineering graduate with strong full-stack development and machine learning project experience. Skilled in React.js, Node.js, Express.js, Flask, MongoDB, MySQL, Java, Python, and RESTful API development. Hands-on experience building scalable, data-driven systems, implementing secure authentication, deploying predictive models, and delivering clean, maintainable solutions in Agile-style development environments.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, PHP, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Flask, JSP, Servlets, Streamlit

Machine Learning & Data Analytics: Scikit-learn, Pandas, NumPy, Random Forest, Regression Models, Feature Engineering, Model Evaluation (R^2 , MAE, RMSE), Cross-Validation, Explainable AI (XAI)

Databases: MongoDB, MySQL, SQLite

Web & Backend Development: RESTful APIs, MVC Architecture, CRUD Operations, JWT Authentication & Authorization, Role-Based Access Control

Tools & Practices: Git, NetBeans, Android Studio, Apache Tomcat, OOP, Agile Methodologies, Modular Design, Validation & Error Handling, DAO Pattern

EDUCATION

BSc (Hons) Software Engineering - Completed with Second Upper Division | May 2025 - March 2026

Cardiff Metropolitan University (Partnered with ICBT Sri Lanka)

Higher Diploma in Computing and Software Engineering - Completed with Merit Pass | May 2023 - Dec 2024

Cardiff Metropolitan University (Partnered with ICBT Sri Lanka)

PROJECT EXPERIENCE

AI-Driven Plant Health Monitoring System - Final Year Academic Project

Technologies: Python, Flask, Scikit-learn, React.js, MongoDB, JWT, Git

Repository: [AI-Driven-Plant-Health-System](#)

- Developed a Random Forest classification model with 200 trees, achieving 95%+ accuracy for plant health prediction.
- Built a Flask REST API and React.js frontend for real-time predictions, dashboards, and visualization.
- Implemented JWT authentication, MongoDB-backed prediction history, confidence scoring, and automated PDF report generation.
- Applied Explainable AI (XAI) techniques to improve transparency and trust in prediction outputs.
- Structured the application with MVC architecture and modular design for maintainability and scalability.

Real Estate Price Prediction System

Technologies: Python, Pandas, NumPy, Scikit-learn, Flask, Streamlit

Repository: [Flat-prediction](#)

- Built an end-to-end regression pipeline using 100,000+ records and 19 feature columns.
- Designed a Scikit-learn Pipeline with ColumnTransformer to manage preprocessing and prevent data leakage.
- Trained a Random Forest Regressor, achieving R^2 around 0.997 with low MAE and RMSE.
- Deployed the model through a Flask API and Streamlit interface for interactive testing and demonstration.

Ocean View Resort Web Application

Technologies: Web application project - GitHub repository provided

Repository: [Ocean-View-Resort](#)

- Created a portfolio-ready resort web application repository with organized project structure and reusable components.
- Demonstrated practical project organization, validation awareness, and maintainable code practices.

CAREER HIGHLIGHTS

- Completed BSc (Hons) Software Engineering with Second Upper Division and Higher Diploma with Merit Pass.
- Delivered portfolio projects across MERN stack, Flask APIs, Java/JSP/Servlets, machine learning, and data analytics.
- Implemented secure authentication, REST APIs, database-backed workflows, reusable MVC/DAO layers, and validation logic.
- Built ML pipelines using Scikit-learn, Pandas, NumPy, Random Forest models, and model evaluation metrics.

ADDITIONAL PROJECT EXPERIENCE

Learning Management System (LMS)

Technologies: MERN Stack - React.js, Node.js, Express.js, MongoDB

- Developed a full-stack learning platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented RESTful APIs, role-based authentication, secure data handling, and Git-based Agile workflow.

Pahana Edu Billing System

Technologies: Java, JSP, Servlets, MySQL, Apache Tomcat

-  Repository: [PhahanaEdu](#)
- Developed a database-driven billing system using MVC architecture, authentication, billing workflows, and reusable DAO layers.
- Implemented CRUD operations, validation logic, and deployment on Apache Tomcat.

Banking System - Java Desktop Application

Technologies: Java, NetBeans

- Built a desktop application for account management and transaction handling using OOP principles.
- Applied validation mechanisms and modular GUI design to support data integrity and maintainability.

PROFESSIONAL STRENGTHS & ADDITIONAL INFORMATION

Soft Skills • Problem-solving and analytical thinking • Team collaboration and communication • Time management and adaptability • Attention to detail and self-motivation • Ability to work under pressure	Languages • English - Fluent • Sinhala - Fluent • Tamil - Fluent Personal Details • Full Name: Mohomed Sarook Mohomed Shabeeha • Preferred Name: Shabeesha Sarook • Location: Colombo 07, Sri Lanka
---	---

ROLE FIT & ATS KEYWORDS

Full-stack development | MERN stack | REST API engineering | Backend development | Frontend development | Machine learning applications | Predictive analytics | Flask API deployment | Java web applications | Database-driven systems | Authentication and authorization | MVC architecture | Agile collaboration | Git version control
